

Vaccines For Children Program

Children's Health Partners participates in the Vaccines For Children (VFC) program. This program is funded by the state and allows families to receive vaccines at a much reduced rate if their child does not have health insurance, or if the insurance does not cover the vaccinations. Each family must check with their insurance provider, and confirm their vaccine coverage *prior* to their appointment. If you would like to be enrolled in the VFC program, please tell the physician or nurse at the time of each visit, and the receptionist when booking every appointment. It is equally important to let us know when you are no longer in need of the VFC program.
